University of Mumbai

Examinations Summer 2022

Course Code: **40505**

Course Name: **Operating System**

Semester : **IV**

Time: 2 hour 30 minutes   Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions are compulsory and carry equal marks
1.	Which of the following is not an operating system?
Option A:	Windows
Option B:	Linux
Option C:	Dos
Option D:	Oracle
2.	Windows uses graphics to make program use to use, such graphics is known as
Option A:	GUI
Option B:	IR
Option C:	DOS
Option D:	IBM
3.	Which of the following is not the state of a process?
Option A:	New
Option B:	Old
Option C:	Waiting
Option D:	Running
4.	What will happen when a process terminates?
Option A:	It is removed from all queues
Option B:	It is removed from all, but the job queue
Option C:	Its process control block is de-allocated
Option D:	Its process control block is never de-allocated
5.	Which of the following algorithm is used in real time system?
Option A:	FCFS
Option B:	Round Robin
Option C:	SJF
Option D:	Priority Scheduling
6.	If the resources are always preempted from the same process _____ can occur
Option A:	Deadlock
Option B:	System crash
Option C:	Starvation
Option D:	Aging

7.	Which algorithm is used to avoid a deadlock?
Option A:	Karl's algorithm
Option B:	Round-robin algorithm
Option C:	Elevator algorithm
Option D:	Banker's algorithm
8.	CPU generates
Option A:	Physical address
Option B:	Logical address
Option C:	Base Address
Option D:	Offset Address
9.	Virtual memory allows
Option A:	execution of a process that may not be completely in memory
Option B:	a program to be smaller than the physical memory
Option C:	a program to be larger than the secondary storage
Option D:	execution of a process without being in physical memory
10.	_____ is not data transfer technique.
Option A:	Programmed I/O
Option B:	Interrupt Driven I/O
Option C:	Direct Memory Access
Option D:	Message Passing

Q2	
A	**Solve any Two** **5 marks each**
i.	What is an operating system? Explain various functions of an operating system.
ii.	Explain process state diagram in detail.
iii.	Explain different file organization methods.
B	**Solve any One** **10 marks each**
i.	Consider the following set of processes, with the length of the CPU burst given in milliseconds:

Process	Burst Time	Priority
P1	10	3
P2	1	1
P3	2	3
P4	1	4
P5	5	2

The processes are assumed to have arrived in the order P1, P2, P3, P4, P5 all at time 0.

a. Draw four Gantt charts that illustrate the execution of these processes using the following scheduling algorithms: FCFS, SJF, non-preemptive priority (a smaller priority number implies a higher priority), and RR (quantum = 1).

b. What is the turnaround time of each process of the scheduling algorithms in part a?

c. What is the waiting time of each process of the scheduling algorithm?

| ii. | Considering a system with five processes P_0 through P_4 and three resources of type A, B, C. Resource type A has 10 instances, B has 5 instances and type C has 7 instances. Suppose at time t_0 following snapshot of the system has been taken: |

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P_0	0	1	0	7	5	3	3	3	2
P_1	2	0	0	3	2	2			
P_2	3	0	2	9	0	2			
P_3	2	1	1	2	2	2			
P_4	0	0	2	4	3	3			

a. What will be the content of the Need matrix?
b. Is the system in a safe state? If Yes, then what is the safe sequence?
c. Can the request be granted if process P_1 requests one additional instance of resource type A and two instances of resource type B

Q3	Solve any Two Questions out of Three	10 marks each
A	Explain the hardware support for paging with TLB in detail.	
B	Suppose that a disk drive has 5000 cylinders, numbered 0 to 4999. The drive is currently serving a request at cylinder 143, and the previous request was at cylinder 125. The queue of pending requests in FIFO is ordered as 80, 1470, 913, 1777, 948, 1022, 1750, 130. What is the total distance that the disk arm moves for following by applying following algorithms? 1. FCFS 2. SSTF 3. SCAN 4. C-SCAN 5. LOOK 6. C-LOOK	
C	Define Semaphore. Explain different types of semaphore in detail.	

Q4	
A	**Solve any Two** 5 marks each
i.	Explain various I/O Buffering Techniques.
ii.	Define thread and discuss different types of threads.
iii.	Explain PCB with respect to context switching.
B	**Solve any One** 10 marks each
i.	Define Deadlock. Explain the four necessary conditions to occur deadlock? Explain deadlock prevention technique.
ii.	Explain various characteristics of memory system in detail.
