| Course Code: | Course Title | Credit |
|--------------|------------------|--------|
| CSC701 | Machine Learning | 3 |

| Prerequ | Prerequisite: Engineering Mathematics, Data Structures, Algorithms | | | | |
|---------|--|--|--|--|--|
| Course | Course Objectives: | | | | |
| 1 | To introduce the basic concepts and techniques of Machine Learning. | | | | |
| 2 | To acquire in depth understanding of various supervised and unsupervised algorithms | | | | |
| 3 | To be able to apply various ensemble techniques for combining ML models. | | | | |
| 4 | To demonstrate dimensionality reduction techniques. | | | | |
| Course | Outcomes: | | | | |
| 1 | To acquire fundamental knowledge of developing machine learning models. | | | | |
| 2 | To select, apply and evaluate an appropriate machine learning model for the given | | | | |
| 3 | application. To demonstrate ensemble techniques to combine predictions from different models. | | | | |
| 4 | To demonstrate the dimensionality reduction techniques. | | | | |

| Module | | Content | Hrs |
|--------|-----|---|-----|
| 1 | | Introduction to Machine Learning | 04 |
| | | Machine Learning, Types of Machine Learning, Issues in Machine | |
| | 1.1 | Learning, Application of Machine Learning, Steps in developing a | |
| | | Machine Learning Application. | |
| | 1.2 | Training Error, Generalization error, Overfitting, Underfitting, Bias- | |
| | 1.2 | Variance trade-off. | |
| 2 | | Learning with Regression and Trees | 09 |
| | D 1 | Learning with Regression: Linear Regression, Multivariate Linear | |
| | 2.1 | Regression, Logistic Regression. | |
| | | Learning with Trees: Decision Trees, Constructing Decision Trees using | |
| | 2.2 | Gini Index (Regression), Classification and Regression Trees (CART) | |
| | 2.3 | Performance Metrics: Confusion Matrix, [Kappa Statistics], Sensitivity, | |
| | 2.3 | Specificity, Precision, Recall, F-measure, ROC curve | |
| 3 | | Ensemble Learning | 06 |
| | 3.1 | Understanding Ensembles, K-fold cross validation, Boosting, Stumping, | |
| | 5.1 | XGBoost | |
| | 3.2 | Bagging, Subagging, Random Forest, Comparison with Boosting, | |
| | 5.2 | Different ways to combine classifiers | |
| 4 | | Learning with Classification | 08 |
| | | Support Vector Machine | |
| | 4.1 | Constrained Optimization, Optimal decision boundary, Margins and | |
| | 7.1 | support vectors, SVM as constrained optimization problem, Quadratic | |
| | | Programming, SVM for linear and nonlinear classification, Basics of | |

| | | Kernel trick. | | |
|---|-----|--|-------|----|
| | 4.2 | Support Vector Regression, Multiclass Classification | | |
| 5 | | Learning with Clustering | | 07 |
| | 5.1 | Introduction to clustering with overview of distance metrics and major | | |
| | 5.1 | clustering approaches. | | |
| | | Graph Based Clustering: Clustering with minimal spanning tree | | |
| | 5.2 | Model based Clustering: Expectation Maximization Algorithm, | | |
| | | Density Based Clustering: DBSCAN | | |
| 6 | | Dimensionality Reduction | | 05 |
| | 6.1 | Dimensionality Reduction Techniques, Principal Component Analysis, | | |
| | 0.1 | Linear Discriminant Analysis, Singular Valued Decomposition. | | |
| | | | Total | 39 |

| CSC702 | Big Data Analysis | 03 |

| Prer | Prerequisite: Database, Data mining. | | | | |
|------|---|--|--|--|--|
| Cou | Course Objectives: The course aims: | | | | |
| 1 | To provide an overview of the big data platforms, its use cases and Hadoop ecosystem. | | | | |
| 2 | To introduce programming skills to build simple solutions using big data technologies such as MapReduce, Scripting for No SQL and R | | | | |
| 3 | To learn the fundamental techniques and principles in achieving big data analytics with scalability and streaming capability. | | | | |
| 4 | To enable students to have skills that will help them to solve complex real-world problems for decision support. | | | | |
| Cou | rse Outcomes: | | | | |
| 1 | Understand the building blocks of Big Data Analytics. | | | | |
| 2 | Apply fundamental enabling techniques like Hadoop and MapReduce in solving real world problems. | | | | |
| 3 | Understand different NoSQL systems and how it handles big data. | | | | |
| 4 | Apply advanced techniques for emerging applications like stream analytics. | | | | |
| 5 | Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications, etc. | | | | |
| 6 | Apply statistical computing techniques and graphics for analyzing big data. | | | | |

| Module | | Detailed Content | Hours |
|--------|-----|--|-------|
| 1 | | Introduction to Big Data and Hadoop | 2 |
| | 1.1 | Introduction to Big Data - Big Data characteristics and Types of Big Data | |
| | 1.2 | Traditional vs. Big Data business approach | |
| | 1.3 | Case Study of Big Data Solutions | |
| | 1.4 | Concept of Hadoop, Core Hadoop Components; Hadoop Ecosystem | |
| 2 | | Hadoop HDFS and MapReduce | 8 |
| | 2.1 | Distributed File Systems: Physical Organization of Compute Nodes, Large-Scale File-System Organization. | |
| | 2.2 | MapReduce: The Map Tasks, Grouping by Key, The Reduce Tasks, Combiners, Details of MapReduce Execution, Coping With Node Failures. | |
| | 2.3 | Algorithms Using MapReduce: Matrix-Vector Multiplication by MapReduce, Relational-Algebra Operations, Computing Selections by MapReduce, Computing Projections by MapReduce, Union ,Intersection, and Difference by MapReduce | |

| | 2.4 | Hadoop Limitations | |
|---|-----|--|----|
| 3 | | NoSQL | 10 |
| | 3.1 | Introduction to NoSQL, NoSQL Business Drivers | |
| | 3.2 | NoSQL Data Architecture Patterns: Key-value stores, Graph stores, Column family (Bigtable)stores, Document stores, Variations of NoSQL architectural patterns, NoSQL Case Study | |
| | 3.3 | NoSQL solution for big data, Understanding the types of big data problems; Analyzing big data with a shared-nothing architecture; Choosing distribution models: master-slave versus peer-to-peer; NoSQL systems to handle big data problems. | |
| 4 | | Mining Data Streams | 11 |
| | 4.1 | The Stream Data Model: A Data-Stream-Management System, Examples of Stream Sources, Stream Queries, Issues in Stream Processing. | |
| | 4.2 | Sampling Data techniques in a Stream | |
| | 4.3 | Filtering Streams: Bloom Filter with Analysis. | |
| | 4.4 | CountingDistinctElementsinaStream,Count-DistinctProblem, Flajolet-Martin Algorithm, Combining Estimates,Space Requirements | |
| | 4.5 | Counting Ones in a Window: The Cost of Exact Counts, The Datar-Gionis-Indyk-Motwani Algorithm, Query Answering in the DGIM Algorithm, Decaying Windows. | |
| 5 | | Real-Time Big Data Models | 4 |
| | 5.1 | A Model for Recommendation Systems, Content-Based Recommendations, Collaborative Filtering | |
| | 5.2 | Case Study: Product Recommendation | |
| | 5.3 | Social Networks as Graphs, Clustering of Social-Network Graphs, Direct Discovery of Communities in a social graph | |
| 6 | | Data Analytics with R | 4 |
| | 6.1 | Exploring Basic features of R, Exploring RGUI, Exploring RStudio, Handling Basic Expressions in R, Variables in R, Working with Vectors, Storing and Calculating Values in R, Creating and using Objects, Interacting with users, Handling data in R workspace, Executing Scripts, Creating Plots, Accessing help and documentation in R | |
| | 6.2 | Reading datasets and Exporting data from R, Manipulating and Processing Data in R, Using functions instead of script, built-in functions in R | |
| | 6.3 | Data Visualization: Types, Applications | |

| Course | e Objectives: The course aims | | |
| 1 | To define natural language processing and to learn various stages of natural language processing. | | |
| 2 | To describe basic concepts and algorithmic description of the main language levels: Morphology, Syntax, Semantics, and Pragmatics &Discourse analysis. | | |
| 3 | To design and implement various language models and POS tagging techniques. | | |
| 4 | To design and learn NLP applications such as Information Extraction, Question answering. | | |
| 5 | To design and implement applications based on natural language processing. | | |
| Course | Course Outcomes: Students will be able | | |
| 1 | To describe the field of natural language processing. | | |
| 2 | To design language model for word level analysis for text processing. | | |
| 3 | To design various POS tagging techniques and parsers. | | |
| 4 | To design, implement and test algorithms for semantic and pragmatic analysis. | | |
| 5 | To formulate the discourse segmentation and anaphora resolution. | | |
| 6 | To apply NLP techniques to design real world NLP applications. | | |

| Module | | Detailed Content | Hours |
|--------|-----|--|-------|
| 1 | 1.1 | Introduction to NLP | 3 |
| | | Origin & History of NLP; Language, Knowledge and Grammar in language processing; Stages in NLP; Ambiguities and its types in English and Indian Regional Llanguages; Challenges of NLP; Applications of NLP | |
| | 1.2 | Self-Learning topics: Variety types of tools for regional languages pre-processing and other functionalities | |
| 2 | 2.1 | Word Level Analysis | 9 |
| | | Basic Terms: Tokenization, Stemming, Lemmatization; Survey of English Morphology, Inflectional Morphology, Derivational Morphology; Regular expression with types; Morphological Models: Dictionary lookup, finite state morphology; Morphological parsing with FST (Finite State Transducer);Lexicon free FST Porter Stemmer algorithm; Grams and its variation: Bigram, Trigram; Simple (Unsmoothed) N-grams; N-gram Sensitivity to the Training Corpus; Unknown Words: Open versus closed vocabulary tasks; Evaluating N-grams: Perplexity; | |

| | | Smoothing: Laplace Smoothing, Good-Turing Discounting; | |
|---|-----|---|----|
| | | | |
| | 2.2 | Self-Learning topics: Noisy channel models, various edit distance, Advance Issues in Language Modelling | |
| 3 | 3.1 | Syntax analysis | 10 |
| | | Part-Of-Speech tagging(POS); Tag set for English (Upenn Treebank); Difficulties /Challenges in POS tagging; Rule-based, Stochastic and Transformation-based tagging; Generative Model: Hidden Markov Model (HMM Viterbi) for POS tagging; | |
| | | Issues in HMM POS tagging; Discriminative Model: Maximum Entropy model, Conditional random Field (CRF);Parsers: Top down and Bottom up; Modelling constituency; Bottom Up Parser: CYK, PCFG (Probabilistic Context Free Grammar), Shift Reduce Parser; Top Down Parser: Early Parser, Predictive Parser | |
| | 3.2 | Self-Learning topics: Evaluating parsers, Parsers based language modelling, Regional languages POS tree banks | |
| 4 | 4.1 | Semantic Analysis | 7 |
| | | Introduction, meaning representation; Lexical Semantics; Corpus study; Study of Various language dictionaries like WorldNet, Babelnet; Relations among lexemes & their senses –Homonymy, Polysemy, Synonymy, Hyponymy; Semantic Ambiguity; Word Sense Disambiguation (WSD); Knowledge based approach(Lesk's Algorithm), Supervised (Naïve Bayes, Decision List),Introduction to Semi-supervised method (Yarowsky) Unsupervised (Hyperlex) | |
| | 4.2 | Self-Learning topics: Dictionaries for regional languages, Distributional Semantics, Topic Models | |
| 5 | 5.1 | Pragmatic & Discourse Processing | 5 |
| | | Discourse: Reference Resolution, Reference Phenomena, Syntactic & Semantic constraint on coherence; Anaphora Resolution using Hobbs and Cantering Algorithm | |
| | 5.2 | Self-Learning topics: Discourse segmentation, Conference resolution | |
| 6 | 6.1 | Applications of NLP | 5 |
| | | Case studies on (preferable in regional language):Machine translation; Text Summarization; Sentiment analysis; Information retrieval; Question Answering system | |
| | 6.2 | Self-Learning topics: Applications based on Deep Neural Network with NLP such as LSTM network, Recurrent Neural network etc. | |

Internal Assessment:

Assessment consists of two class tests of 20 marks each. The first-class test is to be conducted when approx. 40% syllabus is completed and second class test when additional 40% syllabus is completed. Duration of each test shall be one hour.

End Semester Theory Examination:

1 Question paper will consist of 6 questions, each carrying 20 marks.

2 The students need to solve a total of 4 questions.

3 Question No.1 will be compulsory and based on the entire syllabus.

4 Remaining question (Q.2 to Q.6) will be selected from all the modules.

| | | | | | | | |
| Cours | e Objectives: The course aims: | | | | | | |
| 1 | To understand the need and significance of Virtual Reality. | | | | | | |
| 2 | To explore the concepts of Virtual reality and develop 3D virtual environments. | | | | | | |
| 3 | To understand the technical and engineering aspects of virtual reality systems. | | | | | | |
| 4 | To analyze various techniques for applying virtual reality. | | | | | | |
| 5 | To provide a foundation to the fast growing field of AR and make the students aware of the | | | | | | |
| | various AR devices. | | | | | | |
| | | | | | | | |
| Cours | e Outcomes: Learners will be able to | | | | | | |
| 1: | Describe how VR systems work and list the applications of VR | | | | | | |
| 2: | Elaborate geometric presentation of the virtual world and its operations. | | | | | | |
| 3: | Explain the concepts of motion and tracking in VR systems. | | | | | | |
| 4: | Design and implementation of the hardware that enables VR systems tobe built. | | | | | | |
| 5: | Describe how AR systems work and analyze the hardware requirement of AR | | | | | | |
| 6: | Analyze and understand the working of various state of the art AR devices. | | | | | | |

| Module | Detailed Content | Hours |
|--------|---|-------|
| 1 | Introduction to Virtual Reality | 5 |
| | What is virtual reality? ,The beginnings of VR , VR paradigms , | |
| | Collaboration, Virtual reality systems, Representation ,User interaction | |
| 2 | The Geometry of Virtual Worlds | 6 |
| | Geometric Models, Changing Position and Orientation, Axis-Angle | |
| | Representations of Rotation, Viewing Transformations, Chaining the | |
| | Transformations | |
| 3 | Motion in Real and Virtual Worlds | 6 |

| Course Code: | Course Title | Credit |
|--------------|--------------|--------|
| CSDC7022 | Blockchain | 3 |

| Pre | Prerequisite: Cryptography and System Security | | |
|-----|---|--|--|
| Co | Course Objectives: | | |
| 1 | Understand blockchain platforms and its terminologies. | | |
| 2 | Understand the use of cryptography required for blockchain. | | |
| 3 | Understand smart contracts, wallets, and consensus protocols. | | |
| 4 | Design and develop blockchain applications | | |
| | | | |
| Co | urse Outcomes: | | |
| 1 | Explain blockchain concepts. | | |
| 2 | Apply cryptographic hash required for blockchain. | | |
| 3 | Apply the concepts of smart contracts for an application. | | |
| 4 | Design a public blockchain using Ethereum. | | |
| 5 | Design a private blockchain using Hyperledger. | | |
| 6 | Use different types of tools for blockchain applications. | | |

| Module | | Content | Hrs |
|--------|-----|---|-----|
| 1 | | Introduction to Blockchain | 6 |
| | 1.1 | What is a blockchain, Origin of blockchain (cryptographically secure | |
| | | hash functions), Foundation of blockchain: Merkle trees | |
| | 1.2 | Components of blockchain, Block in blockchain, Types: Public, | |
| | | Private, and Consortium, Consensus Protocol, Limitations and | |
| | | Challenges of blockchain | |
| 2 | | Cryptocurrency | 6 |
| | 2.1 | Cryptocurrency: Bitcoin, Altcoin, and Tokens (Utility and Security), | |
| | | Cryptocurrency wallets: Hot and cold wallets, Cryptocurrency usage, | |
| | | Transactions in Blockchain, UTXO and double spending problem | |
| | 2.2 | Bitcoin blockchain: Consensus in Bitcoin, Proof-of-Work (PoW), | |
| | | Proof-of-Burn (PoB), Proof-of-Stake (PoS), and Proof-of-Elapsed | |
| | | Time (PoET), Life of a miner, Mining difficulty, Mining pool and its | |
| | | methods | |
| 3 | | Programming for Blockchain | 8 |
| | 3.1 | Introduction to Smart Contracts, Types of Smart Contracts, Structure | |
| | | of a Smart Contract, Smart Contract Approaches, Limitations of | |
| | | Smart Contracts | |
| | 3.2 | Introduction to Programming: Solidity Programming – Basics, | |
| | | functions, Visibility and Activity Qualifiers, Address and Address | |
| | | Payable, Bytes and Enums, Arrays-Fixed and Dynamic Arrays, | |
| | | Special Arrays-Bytes and strings, Struct, Mapping, Inheritance, Error | |
| | | handling | |
| | 3.3 | Case Study – Voting Contract App, Preparing for smart contract | |
| | | development | |

| 4 | | Public Blockchain | 8 |
|---|-----|--|---|
| | | Introduction to Public Blockchain, Ethereum and its Components, | |
| | | Mining in Ethereum, Ethereum Virtual Machine (EVM), Transaction, | |
| | | Accounts, Architecture and Workflow, Comparison between Bitcoin | |
| | | and Ethereum | |
| | | Types of test-networks used in Ethereum, Transferring Ethers using | |
| | | Metamask, Mist Wallet, Ethereum frameworks, Case study of | |
| | | Ganache for Ethereum blockchain. Exploring etherscan.io and ether | |
| | | block structure | |
| 5 | | Private Blockchain | 8 |
| | 5.1 | Introduction, Key characteristics, Need of Private Blockchain, Smart | |
| | | Contract in a Private Environment, State Machine Replication, | |
| | | Consensus Algorithms for Private Blockchain - PAXOS and RAFT, | |
| | | Byzantine Faults: Byzantine Fault Tolerant (BFT) and Practical BFT | |
| | 5.2 | Introduction to Hyperledger, Tools and Frameworks, Hyperledger | |
| | | Fabric, Comparison between Hyperledger Fabric & Other | |
| | | Technologies | |
| | 5.3 | Hyperledger Fabric Architecture, Components of Hyperledger Fabric: | |
| | | MSP, Chain Codes, Transaction Flow, Working of Hyperledger | |
| | | Fabric, Creating Hyperledger Network, Case Study of Supply Chain | |
| | | Management using Hyperledger | |
| 6 | | Tools and Applications of Blockchain | 3 |
| | | Corda, Ripple, Quorum and other Emerging Blockchain Platforms, | |
| | | Blockchain in DeFi: Case Study on any of the Blockchain Platforms. | |

| Textbooks: | | | | | |

Probability Distributions: Central tendency and Dispersion; Binomial, Normal, Poisson, Weibull, Exponential, relations between them and their significance. Measures of Dispersion:Mean, Median, Mode, Range, Mean Deviation, Standard Deviation, Variance, Skewness and Kurtosis. | 08 |
| 02 | Reliability Concepts: Reliability definitions, Importance of Reliability, Quality Assurance and Reliability, Bath Tub Curve. Failure Data Analysis: Hazard rate, failure density, Failure Rate, Mean Time To Failure (MTTF), MTBF, Reliability Functions. Reliability Hazard Models: Constant Failure Rate, Linearly increasing, Time Dependent Failure Rate, Weibull Model. Distribution functions and reliability analysis. | 08 |
| 03 | System Reliability: System Configurations: Series, parallel, mixed configuration, k out of n structure, Complex systems. | 05 |
| 04 | Reliability Improvement: Redundancy Techniques: Element redundancy, Unit redundancy, Standby redundancies. Markov analysis. System Reliability Analysis – Enumeration method, Cut-set method, Success Path method, Decomposition method. | 08 |
| 05 | MaintainabilityandAvailability:Systemdowntime,DesignforMaintainability:Maintenance requirements,Design methods:Fault Isolation andself-diagnostics,PartsstandardizationandInterchangeability,ModularizationandAccessibility,Repair VsReplacement.Availability–qualitative aspects. | 05 |
| 06 | Failure Mode, Effects and Criticality Analysis: Failure mode effects analysis, severity/criticality analysis, FMECA examples. Fault tree construction, basic symbols, development of functional reliability block diagram, Fau1t tree analysis and Event tree Analysis | 05 |

Internal Assessment for 20 marks:

Consisting **Two Compulsory Class Tests**

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

- 1. Question paper will comprise of total **six questions**, **each carrying 20 marks**
- 2. Question 1 will be compulsory and should cover maximum contents of the curriculum
- **3. Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 4. Only Four questions need to be solved.

- 1. L.S. Srinath, "Reliability Engineering", Affiliated East-Wast Press (P) Ltd., 1985.
- 2. Charles E. Ebeling, "Reliability and Maintainability Engineering", Tata McGraw Hill.
- 3. B.S. Dhillion, C. Singh, "Engineering Reliability", John Wiley & Sons, 1980.
- 4. P.D.T. Conor, "Practical Reliability Engg.", John Wiley & Sons, 1985.
- 5. K.C. Kapur, L.R. Lamberson, "Reliability in Engineering Design", John Wiley & Sons.
- 6. Murray R. Spiegel, "Probability and Statistics", Tata McGraw-Hill Publishing Co. Ltd.

| ILO 7013 | Management Information System | 03 |

- 1. The course is blend of Management and Technical field.
- 2. Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built
- 3. Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage
- 4. Identify the basic steps in systems development

- 1. Explain how information systems Transform Business
- 2. Identify the impact information systems have on an organization
- 3. Describe IT infrastructure and its components and its current trends
- 4. Understand the principal tools and technologies for accessing information from databases to improve business performance and decision making
- 5. Identify the types of systems used for enterprise-wide knowledge management and how they provide value for businesses

| Sr. No. | Detailed Contents | Hrs |
|---------|---|-----|
| 01 | Introduction To Information Systems (IS): Computer Based Information Systems, Impact of IT on organizations, Importance of IS to Society. Organizational Strategy, Competitive Advantages and IS | 4 |
| 02 | Data and Knowledge Management:Database Approach, Big Data, Datawarehouse and Data Marts, Knowledge ManagementBusiness intelligence (BI):Managers and Decision Making, BI for Data analysisand Presenting Results | 7 |
| 03 | Ethical issues and Privacy: Information Security. Threat to IS, and Security Controls | 7 |
| 04 | Social Computing (SC): Web 2.0 and 3.0, SC in business-shopping, Marketing, Operational and Analytic CRM, E-business and E-commerce – B2B B2C. Mobile commerce. | 7 |
| 05 | Computer Networks Wired and Wireless technology, Pervasive computing, Cloud computing model. | 6 |
| 06 | Information System within Organization: Transaction Processing Systems, Functional Area Information System, ERP and ERP support of Business Process. Acquiring Information Systems and Applications: Various System development life cycle models. | 8 |

| ILO 7015 | Operations Research | 03 |

- 1. Formulate a real-world problem as a mathematical programming model.
- 2. Understand the mathematical tools that are needed to solve optimization problems.
- 3. Use mathematical software to solve the proposed models.

- 1. Understand the theoretical workings of the simplex method, the relationship between a linear program and its dual, including strong duality and complementary slackness.
- 2. Perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change.
- 3. Solve specialized linear programming problems like the transportation and assignment problems, solve network models like the shortest path, minimum spanning tree, and maximum flow problems.
- 4. Understand the applications of integer programming and a queuing model and compute important performance measures

| Sr. No. | Detailed Contents | Hrs |
|---------|---|-----|
| 01 | Introduction to Operations Research: Introduction, , Structure of the Mathematical Model, Limitations of Operations Research Linear Programming: Introduction, Linear Programming Problem, Requirements of LPP, Mathematical Formulation of LPP, Graphical method, Simplex Method Penalty Cost Method or Big M-method, Two Phase Method, Revised simplex method, Duality, Primal – Dual construction, Symmetric and Asymmetric Dual, Weak Duality Theorem, Complimentary Slackness Theorem, Main Duality Theorem, Dual Simplex Method, Sensitivity Analysis Transportation Problem: Formulation, solution, unbalanced Transportation problem. Finding basic feasible solutions – Northwest corner rule, least cost method and Vogel's approximation method. Optimality test: the stepping stone method and MODI method. Assignment Problem: Introduction, Mathematical Formulation of the Problem, Hungarian Method Algorithm, Processing of n Jobs Through Two Machines and m Machines, Graphical Method of Two Jobs m Machines Problem Routing Problem, Travelling Salesman Problem Integer Programming Problem: Introduction, Types of Integer Programming Problems, Gomory's cutting plane Algorithm, Branch and Bound Technique. Introduction to Decomposition algorithms. | 14 |
| 02 | Queuing models : queuing systems and structures, single server and multi-server models, Poisson input, exponential service, constant rate service, finite and infinite population | 05 |
| 03 | Simulation : Introduction, Methodology of Simulation, Basic Concepts, Simulation Procedure, Application of Simulation Monte-Carlo Method: Introduction, Monte-Carlo Simulation, Applications of Simulation, Advantages | 05 |

| | of Simulation, Limitations of Simulation | |
|----|--|----|
| 04 | Dynamic programming . Characteristics of dynamic programming. Dynamic programming approach for Priority Management employment smoothening, capital budgeting, Stage Coach/Shortest Path, cargo loading and Reliability problems. | 05 |
| 05 | Game Theory . Competitive games, rectangular game, saddle point, minimax (maximin) method of optimal strategies, value of the game. Solution of games with saddle points, dominance principle. Rectangular games without saddle point – mixed strategy for 2 X 2 games. | 05 |
| 06 | Inventory Models : Classical EOQ Models, EOQ Model with Price Breaks, EOQ with Shortage, Probabilistic EOQ Model, | 05 |

| ILO 7017 | Disaster Management and Mitigation Measures | 03 |

Objectives:

- 1. To understand physics and various types of disaster occurring around the world
- 2. To identify extent and damaging capacity of a disaster
- 3. To study and understand the means of losses and methods to overcome /minimize it.
- 4. To understand role of individual and various organization during and after disaster
- 5. To understand application of GIS in the field of disaster management
- 6. To understand the emergency government response structures before, during and after disaster

Outcomes: Learner will be able to...

- 1. Get to know natural as well as manmade disaster and their extent and possible effects on the economy.
- 2. Plan of national importance structures based upon the previous history.
- 3. Get acquainted with government policies, acts and various organizational structure associated with an emergency.
- 4. Get to know the simple do's and don'ts in such extreme events and act accordingly.

| Sr. No. | Detailed Contents | Hrs |
|------------|---|-----|
| 01 | Introduction 1.1 Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. Introduction to global warming and climate change. | 03 |
| 02 | Natural Disaster and Manmade disasters: 2.1 Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion 2.2 Manmade Disasters: Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters. | 09 |
| 03 | Disaster Management, Policy and Administration 3.1 Disaster management: meaning, concept, importance, objective of disaster management policy, disaster risks in India, Paradigm shift in disaster management. 3.2 Policy and administration: Importance and principles of disaster management policies, command and co-ordination of in disaster management, rescue operations-how to start with and how to proceed in due course of time, study of flowchart showing the entire process. | 06 |
| 04 | Institutional Framework for Disaster Management in India: 4.1 Importance of public awareness, Preparation and execution of emergency management program. Scope and responsibilities of National Institute of Disaster Management (NIDM) and National disaster management authority (NDMA) in India. Methods and measures to avoid disasters, Management of casualties, set up of emergency facilities, importance of effective communication amongst different agencies in such situations. | 06 |

| | 4.2 Use of Internet and softwares for effective disaster management. Applications of GIS, Remote sensing and GPS in this regard. | |
|----|---|----|
| 05 | Financing Relief Measures: 5.1 Ways to raise finance for relief expenditure, role of government agencies and NGO's in this process, Legal aspects related to finance raising as well as overall management of disasters. Various NGO's and the works they have carried out in the past on the occurrence of various disasters, Ways to approach these teams. 5.2 International relief aid agencies and their role in extreme events. | 09 |
| 06 | Preventive and Mitigation Measures: 6.1 Pre-disaster, during disaster and post-disaster measures in some events in general 6.2 Structural mapping: Risk mapping, assessment and analysis, sea walls and embankments, Bio shield, shelters, early warning and communication 6.3 Non Structural Mitigation: Community based disaster preparedness, risk transfer and risk financing, capacity development and training, awareness and education, contingency plans. 6.4 Do's and don'ts in case of disasters and effective implementation of relief aids. | 06 |

| ILO 7018 | Energy Audit and Management | 03 |

Objectives:

- 1. To understand the importance energy security for sustainable development and the fundamentals of energy conservation.
- 2. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management
- 3. To relate the data collected during performance evaluation of systems for identification of energy saving opportunities.

Outcomes: Learner will be able to...

- 1. To identify and describe present state of energy security and its importance.
- 2. To identify and describe the basic principles and methodologies adopted in energy audit of an utility.
- 3. To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities.
- 4. To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities
- 5. To analyze the data collected during performance evaluation and recommend energy saving measures

| Sr. No | Detailed Contents | Hrs |
|--------|---|-----|
| 01 | Energy Scenario: Present Energy Scenario, Energy Pricing, Energy Sector Reforms, Energy Security, Energy Conservation and its Importance, Energy Conservation Act-2001 and its Features. Basics of Energy and its various forms, Material and Energy balance | 04 |
| 02 | Energy Audit Principles: Definition, Energy audit- need, Types of energy audit, Energy management (audit) approach-understanding energy costs, Bench marking, Energy performance, Matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution. Elements of monitoring& targeting; Energy audit Instruments; Data and information-analysis. Financial analysis techniques: Simple payback period, NPV, Return on investment (ROI), Internal rate of return (IRR) | 08 |
| 03 | Energy Management and Energy Conservation in Electrical System: Electricity billing, Electrical load management and maximum demand Control; Power factor improvement, Energy efficient equipments and appliances, star ratings. Energy efficiency measures in lighting system, Lighting control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy conservation opportunities in: water pumps, industrial drives, induction motors, motor retrofitting, soft starters, variable speed drives. | 10 |
| 04 | Energy Management and Energy Conservation in Thermal Systems: Review of different thermal loads; Energy conservation opportunities in: Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system. General fuel economy measures in Boilers and furnaces, Waste heat recovery, | 10 |

| | use of insulation- types and application. HVAC system: Coefficient of performance, Capacity, factors affecting Refrigeration and Air Conditioning system performance and savings opportunities. | |
|----|--|----|
| 05 | Energy Performance Assessment: On site Performance evaluation techniques, Case studies based on: Motors and variable speed drive, pumps, HVAC system calculations; Lighting System: Installed Load Efficacy Ratio (ILER) method, Financial Analysis. | 04 |
| 06 | Energy conservation in Buildings: Energy Conservation Building Codes (ECBC): Green Building, LEED rating, Application of Non-Conventional and Renewable Energy Sources | 03 |

| ILO7019 | Development Engineering | 03 |

Objectives:

- 1. To understand the characteristics of rural Society and the Scope, Nature and Constraints of rural
 - Development.
- 2. To study Implications of 73rd CAA on Planning, Development and Governance of Rural Areas
- 3. An exploration of human values, which go into making a 'good' human being, a 'good' professional, a 'good' society and a 'good life' in the context of work life and the personal life of modern Indian professionals
- 4. To understand the Nature and Type of Human Values relevant to Planning Institutions

Outcomes: Learner will be able to...

- 1. Apply knowledge for Rural Development.
- 2. Apply knowledge for Management Issues.
- 3. Apply knowledge for Initiatives and Strategies
- 4. Develop acumen for higher education and research.
- 5. Master the art of working in group of different nature.
- 6. Develop confidence to take up rural project activities independently

| Sr. | Module Contents | Hrs |
|-----|---|-----|
| No. | | |
| 01 | Introduction to Rural Development Meaning, nature and scope of development; Nature of rural society in India; Hierarchy of settlements; Social, economic and ecological constraints for rural development Roots of Rural Development in India Rural reconstruction and Sarvodaya programme before independence; Impact of voluntary effort and Sarvodaya Movement on rural development; Constitutional direction, directive principles; Panchayati Raj - beginning of planning and community development; National extension services. | 08 |
| 02 | Post-Independence rural Development Balwant Rai Mehta Committee - three tier system of rural local Government; Need and scope for people's participation and Panchayati Raj; Ashok Mehta Committee - linkage between Panchayati Raj, participation and rural development | 04 |
| 03 | Rural Development Initiatives in Five Year Plans Five Year Plans and Rural Development; Planning process at National, State, Regional and District levels; Planning, development, implementing and monitoring organizations and agencies; Urban and rural interface - integrated approach and local plans; Development initiatives and their convergence; Special component plan and sub-plan for the weaker section; Micro-eco zones; Data base for local planning; Need for decentralized planning; Sustainable rural development. | 06 |
| 04 | Post 73rd Amendment Scenario 73rd Constitution Amendment Act, including - XI schedule, devolution of powers, functions and finance; Panchayati Raj institutions - organizational linkages; Recent changes in rural local planning; Gram Sabha - revitalized Panchayati Raj; Institutionalization; resource mapping, resource mobilization including | 04 |

| | social mobilization; Information Technology and rural planning; Need | |
|----|--|----|
| | for further amendments. | |
| 05 | Values and Science and Technology Material development and its | 10 |
| | values; the challenge of science and technology; Values in planning | |
| | profession, research and education. | |
| | Types of Values Psychological values — integrated personality; mental | |
| | health; Societal values — the modern search for a good society; justice, | |
| | democracy, rule of law, values in the Indian constitution; | |
| | Aesthetic values — perception and enjoyment of beauty; Moral and | |
| | ethical values; nature of moral judgment; Spiritual values; different | |
| | concepts; secular spirituality; Relative and absolute values; | |
| | Human values— humanism and human values; human rights; human | |
| | values as freedom, creativity, love and wisdom. | |
| 06 | Ethics Canons of ethics; ethics of virtue; ethics of duty; ethics of | 04 |
| | responsibility; Work ethics; | |
| | Professional ethics; Ethics in planning profession, research and | |
| | education | |

- 1. Question paper will comprise of total six questions, each carrying 20 marks
- 2. Question 1 will be compulsory and should cover maximum contents of the curriculum
- 3. Remaining questions will be mixed in nature (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 4. Only Four questions need to be solved

Oral & Practical exam. Based on the entire syllabus CSC7011 Machine Learning and CSL7011: Machine Learning Lab

| Lab Code | Lab Name | Credit |
|----------|------------------------|--------|
| CSL7012 | Big Data Analytics Lab | 1 |

| Pre | Prerequisite: C Programming Language. | | | |
|-----|---|--|--|--|
| Lał | Objectives: Students will be able to | | | |
| 1 | Solve Big Data problems using Map Reduce Technique and apply to various algorithms. | | | |
| 2 | Identify various types of NoSQL databases and execute NOSQL commands | | | |
| 3 | Understand implementation of various analytic techniques using Hive/PIG/R/Tableau, etc. | | | |
| 4 | Apply streaming analytics to real time applications. | | | |
| Lał | Lab Outcomes: | | | |
| 1 | To interpret business models and scientific computing paradigms, and apply software tools for | | | |
| | big data analytics. | | | |
| 2 | To implement algorithms that uses Map Reduce to apply on structured and unstructured data | | | |
| 3 | To perform hands-on NoSql databases such as Cassandra, HadoopHbase, MongoDB, etc. | | | |
| 4 | To implement various data streams algorithms. | | | |
| 5 | To develop and analyze the social network graphs with data visualization techniques. | | | |

| Suggestee | l List of Experiments |
|-----------|--|
| (5 | select a case study and perform the experiments 1 to 8.). |
| St | ar (*) marked experiments are compulsory. |
| Sr. No. | Name of the Experiment |
| 1* | Hadoop HDFS Practical: |
| | -HDFS Basics, Hadoop Ecosystem Tools Overview. |
| | -Installing Hadoop. |
| | -Copying File to Hadoop. |
| | -Copy from Hadoop File system and deleting file. |
| | -Moving and displaying files in HDFS. |
| | -Programming exercises on Hadoop |
| 2 | Use of Sqoop tool to transfer data between Hadoop and relational database servers. |
| | a. Sqoop - Installation. |
| | b. To execute basic commands of Hadoop eco system componentSqoop. |
| 3* | To install and configure MongoDB/ Cassandra/ HBase/ Hypertable to execute NoSQL |
| | commands |
| 4 | Experiment on Hadoop Map-Reduce: |
| 5 | -Write a program to implement a word count program using MapReduce. |
| 5 | Experiment on Hadoop Map-Reduce: |
| | -Implementing simple algorithms in Map-Reduce: Matrix multiplication, Aggregates, Joins, Sorting, Searching, etc |
| 6 | Create HIVE Database and Descriptive analytics-basic statistics. |
| 7* | Data Stream Algorithms (any one): |
| | - Implementing DGIM algorithm using any Programming Language |
| | - Implement Bloom Filter using any programming language |
| | Implement Flajolet Martin algorithm using any programming language |
| 8 | Social Network Analysis using R (for example: Community Detection Algorithm) |
| 9 | Data Visualization using Hive/PIG/R/Tableau/. |
| | |
| 10 | Exploratory Data Analysis using Spark/ Pyspark. |
| | |

| 1 | .1* | Mini Project: One real life large data application to be implemented (Use standard |
|---|-----|--|
| | | Datasets available on the web). |
| | | - Streaming data analysis – use flume for data capture, HIVE/PYSpark for analysis of |
| | | twitter data, chat data, weblog analysis etc. |
| | | - Recommendation System (for example: Health Care System, Stock Market |
| | | Prediction, Movie Recommendation, etc.) |
| | | SpatioTemporal DataAnalytics |

| CSDL7012 | Quantum Computing Lab | 1 |

| Р | Prerequisite: Python Programming Language. | | |
|---|--|--|--|
| L | Lab Objectives: | | |
| | 1 | To implement fundamental quantum computing concepts | |
| 4 | 2 | To learn quantum computation and quantum information | |
| | 3 | To understand quantum entanglement, quantum algorithms | |
| | Λ | To understand quantum information theory and channels | |

4 To understand quantum information theory and channels

Lab Outcomes: Students will be able to

- 1 Implement basic quantum computing logic by building dice and random numbers using open source simulation tools.
- 2 Understand quantum logic gates using open source simulation tools.
- 3 Implement quantum circuits using open source simulation tools.
- 4 I implement quantum algorithms using open source simulation tools.

Suggested Experiments: Students are required to complete at least 10 experiments. Faculty may develop their own set of experiments for students. List below is only suggestive.

| Sr. No. | Name of the Experiment |
|---------|--|
| 1 | Building Quantum dice |
| 2 | Building Quantum Random No. Generation |
| 3 | Composing simple quantum circuits with q-gates and measuring the output into classical bits. |
| 4 | Implementation of Shor's Algorithms |
| 5 | Implementation of Grover's Algorithm |
| 6 | Implementation of Deutsch's Algorithm |
| 7 | Implementation of Deutsch-Jozsa's Algorithm |
| 8 | Quantum Circuits |
| 9 | Qubit Gates |
| 10 | Bell Circuit & GHZ Circuit |
| 11 | Accuracy of Quantum Phase Estimation |
| 12 | Mini Project such as implementing an API for efficient search using Grover's Algorithms or Integer factorization using Shor's Algorithm. |

| CSDL7021 | Augmented and Virtual Reality Lab | 1 |

| Pr | Prerequisite: Computer Graphics, Image Processing, Python | | |
|----|--|--|--|
| La | Lab Objectives: | | |
| 1 | To perform installation of Unity | | |
| 2 | To explore working of VR Gadget | | |
| 3 | To develop scene VR application | | |
| 4 | To track objects in virtual environment | | |
| La | Lab Outcomes: Learners will be able to | | |
| 1 | Setup VR development environment | | |
| 2 | Use HTC Vive/ Google Cardboard/ Google Daydream and Samsung gear VR. | | |
| 3 | Develop VR scene and place object | | |
| 4 | Work with Augmented Faces features. | | |

| Sugge | sted Experiments: Students are required to complete at least 6 experiments. |
|-------|---|
| | |
| Sr. | Name of the Experiment |
| No. | |
| 1 | Installation of Unity and Visual Studio, setting up Unity for VR development, |
| | understanding documentation of the same. |
| 2 | Demonstration of the working of HTC Vive, Google Cardboard, Google Daydream |
| | and Samsung gear VR. |
| 3 | Develop a scene in Unity that includes: |
| | i. a cube, plane and sphere, apply transformations on the 3 game objects. |
| | ii. add a video and audio source |
| 4 | Develop a scene in Unity that includes a cube, plane and sphere. Create a new |
| | material and texture separately for three Game objects. Change the colour, material |
| | and texture of each Game object separately in the scene. Write a C# program in |
| | visual studio to change the colour and material/texture of the game objects |
| | dynamically on button click. |
| 5 | Develop a scene in Unity that includes a sphere and plane . Apply Rigid body |
| | component, material and Box collider to the game Objects. Write a C# program to |
| | grab and throw the sphere using vr controller. |
| 6 | Develop a simple UI(User interface) menu with images, canvas, sprites and button. |
| | Write a C# program to interact with UI menu through VR trigger button such that on |
| | each successful trigger interaction display a score on scene . |
| 7 | Place a three-dimensional ARCore pawn on detected AR plane surfaces |
| 8 | Using the Augmented Faces feature in your own apps. |

| Course Code | Course Name | Credit |
|-------------|-----------------|--------|
| CSP701 | Maior Project 1 | 03 |

| Course Objectives: | |
|---|--|
| The project work facilitates the students to develop and prove Technical, Professional and Ethical skills and knowledge gained during graduation program by applying them from problem identification, analyzing the problem and designing solutions. | |
| Course Outcomes: Learner will able | |
| 1 | To develop the understanding of the problem domain through extensive review of literature. |
| 2 | To Identify and analyze the problem in detail to define its scope with problem specific data. |
| 3 | To know various techniques to be implemented for the selected problem and related technical skills through feasibility analysis. |
| 4 | To design solutions for real-time problems that will positively impact society and environment |
| 5 | To develop clarity of presentation based on communication, teamwork and leadership skills. |
| 6 | To inculcate professional and ethical behavior. |

Guidelines:

1. Project Topic Selection and Allocation:

Project topic selection Process to be defined and followed:

- Project orientation can be given at the end of sixth semester.
- **o** Students should be informed about the domain and domain experts whose guidance can be taken before selecting projects.
- Student's should be recommended to refer papers from reputed conferences/ journals like IEEE, Elsevier, ACM etc. which are not more than 3 years old for review of literature.
- Students can certainly take ideas from anywhere, but be sure that they should evolve them in the unique way to suit their project requirements. Students can be informed to refer Digital India portal, SIH portal or any other hackathon portal for problem selection.

Topics can be finalized with respect to following criterion:

- **O Topic Selection**: The topics selected should be novel in nature (Product based, Application based or Research based) or should work towards removing the lacuna in currently existing systems.
- **o Technology Used:** Use of latest technology or modern tools can be encouraged.
- Students should not repeat work done previously (work done in the last three years).

- Project work must be carried out by the group of at least 2 students and maximum 4.
- **O** The project work can be undertaken in a research institute or organization/Industry/any business establishment. (out-house projects)
- The project proposal presentations can be scheduled according to the domains and should be judged by faculty who are expert in the domain.
- Head of department and senior staff along with project coordinators will take decision regarding final selection of projects.
- **O** Guide allocation should be done and students have to submit weekly progress report to the internal guide.
- **O** Internal guide has to keep track of the progress of the project and also has to maintain attendance report. This progress report can be used for awarding term work marks.
- In case of industry/ out-house projects, visit by internal guide will be preferred and external members can be called during the presentation at various levels

2. **Project Report Format:**

At the end of semester, each group needs to prepare a project report as per the guidelines issued by the University of Mumbai.

A project report should preferably contain at least following details:

- o Abstract
- o Introduction
- 0 Literature Survey/ Existing system
- Limitation Existing system or research gap
- Problem Statement and Objective
- 0 Proposed System
 - 0 Analysis/Framework/ Algorithm
 - 0 Design details
 - 0 Methodology (your approach to solve the problem) Proposed System
- Experimental Set up
 - o Details of Database or details about input to systems or selected data
 - **o** Performance Evaluation Parameters (for Validation)
 - Software and Hardware Set up
- 0 Implementation Plan for Next Semester
 - Timeline Chart for Term1 and Term-II (Project Management tools can be used.)
- 0 References

Desirable

Students can be asked to undergo some Certification course (for the technical skill set that will be useful and applicable for projects.)

3. Term Work:

Distribution of marks for term work shall be done based on following:

- 0 Weekly Log Report
- Project Work Contribution
- Project Report (Spiral Bound) (both side print)
- o Term End Presentation (Internal)

The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

4. Oral and Practical:

Oral and Practical examination (Final Project Evaluation) of Project 1 should be conducted by Internal and External examiners approved by University of Mumbai at the end of the semester.

Suggested quality evaluation parameters are as follows:

- 0 Quality of problem selected
- o Clarity of problem definition and feasibility of problem solution
- 0 Relevance to the specialization / industrial trends
- o Originality
- Clarity of objective and scope
- Quality of analysis and design
- Quality of written and oral presentation
- O Individual as well as team work
