DLOC MECH

University of Mumbai Examination Summer 2022

Program: **Mechanical Engineering**Curriculum Scheme: CBCGS (REV-2016)

Examination: BE Semester- VIII

Course Code: MEDLO8041

Course Name: Power Plant Engineering

Time: 2.30 Hrs Max. Marks: 80

| 1. | Choose the correct option for following questions. All the Questions are |
|----------------|--|
| | compulsory and carry equal marks |
| 1. | Pumped storage plant in connection with thermal power plant is used to take |
| Option A: | No load SCASCASCASCASCASCASCASCASCASCASCASCASCAS |
| Option B: | Base load See See See See See See See See See Se |
| Option C: | peak load |
| Option D: | Equal load |
| | |
| 2. | What is the principle of operation of steam power plant? |
| Option A: | Carnot cycle |
| Option B: | Rankine cycle |
| Option C: | Brayton cycle |
| Option D: | Stirling cycle |
| | |
| 3. | In combined GT-ST plant no mechanical draught supply needed because |
| Option A: | furnace gas pressure is LOW |
| Option B: | furnace gas pressure is high |
| Option C: | induced or forced draught is not possible and a second sec |
| Option D: | it will increase the cost sold sold sold sold sold sold sold sold |
| 4. | Sum of maximum demands on transformers to the maximum demands is called as |
| Option A: | Demand factor |
| Option B: | Diversity factor |
| Option C: | Use factor |
| Option D: | Capacity factor |
| | |
| 5.2° (5) | Boron or cadmium, used to control the chain reaction by absorbing required neutron in nuclear reactor are called as |
| Option A: | moderator |
| Option B: | shielding School |
| Option C: | Control rods |
| Option D: | reflectors |
| | |
| × 6. (\ \ × ; | Direct runoff constitutes of |
| Option A: | Surface runoff and infiltration |
| Option B: | Rainfall and evaporation |
| Option C: | Surface runoff and prompt inter flow and channel precipitation |
| Option D: | Overland flow |
| | |
| 7. j | What is the name of leading hydroelectric power stations installed in India? |
| Option A: | Kundamkulam |
| Option B: | Kalapakkam |
| Option C: | Narora |
| Option D: | Bhakra Nangal |

| 0 | |
|-----------|--|
| 8. | Method which is commonly applied for unloading the coal for small power plant is |
| Option A: | coal accelerators |
| Option B: | lift trucks |
| Option C: | tower cranes |
| Option D: | belt conveyor |
| | |
| 9. | In thermal power plant, turbine is placed |
| Option A: | before boiler |
| Option B: | in between boiler and generator |
| Option C: | after generator |
| Option D: | at any place |
| | |
| 10. | What is the unit of Heat rate? |
| Option A: | kJ/KW |
| Option B: | KW/kJ |
| Option C: | KW SSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSS |
| Option D: | kJ |

| Q2 | |
|--|---|
| A | Solve any Two 5 marks each |
| i | Explain pumped storage power plant with neat sketch. |
| ii. | What do you understand by tariff? What is the Blockmeter and their the |
| iii. | Prove that for economical load sharing in a nower plant the incremental rate (11/11) |
| | or an power generating this must be equal. |
| В | Solve any One |
| i. | The yearly duration curve of a certain plant can be considered as straight in S. |
| | two units of 100 MW capacity each determine: i) installed capacity ii) load factor iii) plant factor iv) maximum demand v) utilization factor |
| ii. | Explain working of CANDU reactor with neat sketch. |
| Q3 | CARAMA CANTA TARA BARA BARA BARA |
| A A | Solve any Two |
| i. | Write short note on surge tank with neat sketch. 5 marks each |
| ∕ii. S | Write short note on base load and peak load plants. |
| iii. | Write merits and demerits of combined cycle power generation. |
| В | Solve any One 10 marks each |
| | Following data relates to combined gas and steam cycle. |
| | Gas turbine: Pressure ratio for compressor and turbine = 10. |
| 12 2 12 12 12 12 12 12 12 12 12 12 12 12 | Inlet temperature of air = 27°C |
| | Inlet temperature to turbine = 827°C |
| | Isentropic efficiency of compressor = 0.85 |
| | Isentropic efficiency of turbine = 0.90 |
| | Mass flow rate of air $= 100 \text{ kg/sec}$ |
| | C.V of fuel = 44500 kJ/kg |
| | Steam turbine :- |
| | Inlet conditions to turbine = 20 bar, 250°C |
| | Condense pressure = 0.1 bar |
| | Temperature of gas leaving to the chimney from HRSG = 200°C |
| | Find the following |
| | 1. Power output and gas turbine cycle efficiency. |
| | 2. Mass flow rate of fuel and A:F ratio |
| | 3. Amount of stem generated in kg/hr |

| | 4. Rankine cycle power output and efficiency. 5. Overall power output and efficiency of combined plant. Assume Cpg = Cpa = 1.05 kJ/.kg, γ = 1.4 both for air and gas. |
|------|--|
| ii. | Explain with neat sketches the stages of coal handling systems in details. |
| Q4 | |
| A | Solve any Two 5 marks each 5 5 |
| i. | What is radioactivity and radioactive decay? |
| ii. | Discuss Rankine cycle with the help of schematic (T-S) and (h-s) Diagram |
| iii. | i) Explain Fluidised bed combustion |
| В | Solve any One 10 marks each 3 10 marks each 3 |
| i | The data of monthly flow for hydel plant at a site for 12 months is given below. Find the size of reservoir and possible rate of available flow. Month Flow (m3/sec) Month Flow (m3/sec) 1 |
| ii. | The following proposals are under consideration for an industry which has maximum demand of 45 MW and a load factor of 0.45 i) A steam power plant having an initial cost of Rs.1200/kW and maintenance cost of Rs. 2.4 paise/kWh. The coal of CV of 2550 kJ/N is used The overall efficiency of plant is 24%. ii) An hydro plant having a capital cost of Rs. 3600 /kW and a running cost of 0.6 paise/kWh. Assuming interest and depreciation rate of 10% for steam power plant and 8% for hydro plant, determine the price of coal above which steam station is uneconomical. |
